RISK AND REWARD PROFILE

Risk Disclaimer

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

Why is this Sub-Fund in this category?

The Sub-Fund is subject to a high level of risk being linked to typical risks of securities markets, such as the macro-economic trends at global level. At this time, the level of the risk and reward profile is equal to 6.

Not all risks affecting the Sub-Fund are adequately captured by the synthetic risk indicator. The following risks may affect the Sub-Fund:

Operational risk - due to issues such as natural disasters, technical problems and fraud.

Derivative risk - the Sub-Fund may use derivatives as described in the above section - Objectives and Investment Policy. Use of derivatives results in higher chances of loss due to the use of leverage, or borrowing. Derivatives allow investors to earn large returns from small movements in the underlying asset's price. However, investors could lose large amounts if the price of the underlying assets moves against them significantly.

Counterparty risk - the possibility that the counterparty, such as brokers, clearing houses and other agents be unable to perform its obligations due to insolvency, bankruptcy or other causes.

Liquidity risk - investments that could have a lower level of liquidity due to (extreme) market conditions or issuer-specific factors and / or large redemptions of shareholders. Liquidity risk is the risk that a position in the portfolio cannot be sold, liquidated or closed at limited cost in an adequately short time frame as required to meet liabilities of the Sub-Fund.

Full details of all risks the Sub-Fund is exposed to can be found in the prospectus for the Fund (the "Prospectus").
